

VOTER'S PAMPHLET

LOCAL NONPARTISAN CANDIDATES' STATEMENTS OF QUALIFICATIONS

The following pages may not contain a complete list of candidates. A complete list of candidates appears on the Sample Ballot. Each statement is volunteered by, and (unless otherwise determined by the governing body) is printed at the expense of, the candidate.

Statement of **BRUCE JAFFE**, Candidate for
Director
Soquel Creek Water District

Occupation: Research Geologist/Oceanographer **Age:** 51

Water is a precious resource of our community. As a member of the Board of Directors I have worked to protect that resource by (1) enacting an aggressive water conservation program to reduce water usage, (2) developing strategies to minimize the risk of salt water entering our aquifer from the ocean, and (3) decreasing deadly Arsenic in our water by building a state of the art water treatment plant. I will continue to use my technical expertise to develop new and creative approaches to protect our water. My qualifications include:

- *Educated* in sciences related to water (Doctorate in Geology from UCSC, Masters in Geological Oceanography from University of Washington, Bachelors in Earth Sciences from UCSC, 24 years professional experience in Earth Sciences)
- *Active* in the community (25-year resident of mid-County, participates in community groups, knows how water problems relate to local problems and politics)
- *Concerned* that we have an ample safe, clean water supply in the future (father of two, plans on living in mid-County for many years to come)

I appreciate your vote so we can keep the Soquel Water Board on track to ensure clean, fresh water for the future.

Statement of **DANIEL F. KRIEGE**, Candidate for
Director
Soquel Creek Water District

Occupation: Civil Engineer

In the management of our precious water experience definitely counts! My experience in water management, including water supply and water quality, includes careful conservation and the highest concern for our environment. I have been professionally involved in water management for over 35 years. Proper management of our existing water supply with a vision for the future, including fiscal responsibility, is imperative for the Water District. Our water quantity and quality must be adequate to meet our needs. The currently over-drafted ground water supply must be protected from contamination. We need to reduce pumping and create an additional water supply.

As an incumbent member of the Soquel Water District Board of Directors, I have been instrumental in providing sound decisions. My professional career with the Santa Clara Water District as manager of Operations, gave me extensive knowledge in water management. As the former chairperson of the California Water Commission, my experience in state water issues gives me an over-all view of California's water issues, a valuable source of knowledge of state funding for a portion of our supplemental water supply.

Professional consultant in water supply.
Registered Civil Engineer with a Master's Degree.
Vice-president in charge of construction for Habitat for Humanity.

6152-003

Statement of **DON HOERNSCHEMEYER**, Candidate for
Director
Soquel Creek Water District

Occupation: Research Chemist

During my industrial career I helped develop reverse-osmosis technology for water purification. Best-technology solutions like this are needed more than ever as our community faces serious water quality challenges.

In the past, it was sufficient that board members had a good business sense and an honest heart. However, in our modern world, additional skills like my Ph.D. in chemistry are vital for management of our dwindling natural resources. It will be difficult to move beyond the current crises without advanced skills among the board members.

My qualifications for the Board of Directors include:

- Ph.D. in chemistry and professional experience in solving a wide variety of chemical problems.
- Business experience as a manager of Research and Development, and Quality Assurance in several companies.
- Experienced as a board member in a local church and in the Professional and Technical Consultants Association.
- An 18-year resident in mid-county and active in community projects.
- Dedicated to sustainable water management for ourselves and for future generations.

I want your vote so that I can help the water district continue to develop sound solutions to our water issues.
